

Hung out to deodorize

THE OTTAWA CITIZEN JANUARY 30, 2010

FOUND

Nothing is more infuriating than having to send your favourite jacket to the dry cleaners after dining out on sizzling fajitas. The coat isn't dirty, but it smells overpoweringly like fried onions.

Or how many times have you thrown a sweater in the wash not because it's soiled, but stinks like cigarette smoke or sweat?

The FRESHhanger

Cover is an innovative product that eliminates odours and deodorizes clothes without using harsh chemicals or smelly perfumes.

Designed to fit any standard clothes hanger (wire, wood or plastic), the cover is made of an activated carbon material that absorbs odours and humidity.

The result: You save time and money since you don't have to clean your clothes as often. Less washing also prevents clothes from fading and wearing out.

How it works: Simply slide the cover over any hanger and let the activated carbon technology do the work. Fragrance free, the

covers eliminate rather than mask odours.

Cost \$14.99 for a five-pack
