## ➔ FRESHhanger™ Cover

I don't own a lot of dry clean only garments and those that do require dry cleaning often get pushed to the back of my closet because of the time, expense and damage to the environment that dry cleaning can do.

Now thanks to [FRESHhanger™ Covers](#) I can pull those items out again!

The [FRESHhanger™ Cover](#) fits virtually any hanger and eliminates odors from clothing leaving them refreshed for the next use. Simply hang the fragrance-free cover on any hanger and let FRESHhanger's patent pending and laboratory tested activated carbon technology do the work!

[FRESHhanger™ Covers](#) work by using activated carbon which is scientifically proven to effectively absorb and eliminate odors due to its naturally highly porous structure. This makes [FRESHhanger™ Covers](#) 6.4 times more effective than just airing out your clothing!

 *Save time, money and natural resources by reducing the number of times you need to wash or dry clean clothing.*

[FRESHhanger™ Covers](#) are environmentally friendly as well - by using the odor absorbing power of activated carbon, you greatly reduce the frequency of dry cleaning! So that saves you money, gas and time because you won't be making all of those trips to the cleaners!

Hmmm these definitely sound like something my hubby could use for his many work shirts... GREAT review, I'll be checking them out ;)
