

## I. Selecting Your Combination

Please look at the front of the keybox. You will see buttons numbered 1 through 0. You will also see an OPEN button and a CLEAR Button.

There is no preset combination on your keybox. You will select your own combination. Keep the combination in a safe place.

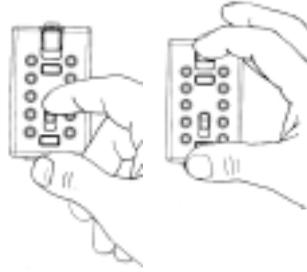

For best results, select between four and seven numbers in your combination. Each number can only be used one time. Do not use number combinations that can be easily guessed such as your phone number, vehicle license plate or street address.

Select a combination and record it below.

## II. Setting Your Combination

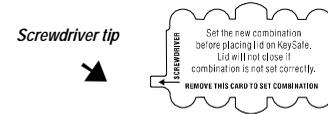

**WARNING!**  
*Improperly setting the combination is not covered under the warranty. Do not remove the screws on the back of the lid. Doing so will void the warranty.*

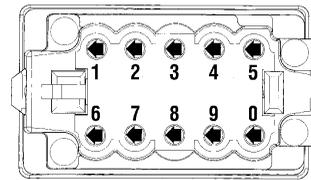

Press down on CLEAR.

Then press down on OPEN button and pull out on the lid.

- 1) Remove the plastic card from the back of the lid by lifting from the center of the edges.

- 2) You will see ten numbered gray buttons with arrows. Turn the lid in your hand so the back is facing you and the number "1" is in the upper left corner of the lid as shown below. (These numbers correspond to the numbered buttons on the front of the lid.)

- 3) All the arrows on the screws point to the left because there is no preset combination.

Arrows pointing to the left are not part of combination.

- 4) Use the screwdriver tip on the plastic card or a small screwdriver to push and rotate the arrows. For each number in your combination, apply light pressure and rotate a half turn so that the arrow points to the right and snaps up.

Arrows rotated a half turn to the right are part of your combination.

- 5) Check to make sure that the arrow of any number that is not in the combination is pointing LEFT.

### CAUTION

*Arrows must point either to the left or to the right. An arrow pointing to the left is not a number in the combination. An arrow pointing to the right is a number in the combination. If any arrow is pointing up, down or has not snapped up, the combination will not work. Test the combination before putting the lid on the box.*

- 6) Replace the plastic card on the back of the lid.

- 7) Place up to 2 keys on the key clip.

## III. Testing Your Combination

Test before putting the lid on the keybox.

- 1) On the front of the lid, push in the numbered buttons that are in your combination.
- 2) Press down on the OPEN button. If the combination is set correctly, the OPEN button will slide down fully. If the combination was set incorrectly, the OPEN button will not slide down.
- 3) If set incorrectly, DO NOT RETURN THE LID TO THE KEYBOX. Press the CLEAR button and refer to section II. Setting Your Combination.
