

Our Pledge

Our products have been designed to be the best, but have also been built to last. Your purchase price includes a Lifetime Replacement Warranty – the first and only guarantee of its kind for these types of products. This means that if one of our serious tools breaks under normal use – ever – just return it for recycling and we will send you a free replacement. Because you'll never have to buy another – nor throw the product away – you'll be helping to **protect the environment while saving money**. Now, that's the kind of “**green**” we can all believe in!

But our commitment to **sustainability** goes even further. Because our products are **Made in the USA**, we dramatically reduce transportation costs - resulting in lower carbon emissions (while providing jobs for American workers). Please let me know what you think. Whether compliments or complaints, I look forward to hearing from you; and feel free to share your stories, testimonials and pictures.
