Scroll Board

Whiteboard with a rotating surface

Most conventional whiteboards on the market today have a flip style design. Because of this, the user is required to vertically flip the entire panel over in order to access the writing surface on the back. This can be extremely inconvenient, break the flow of conversation and take up a lot of space. The PLUS Scroll Board solves these problems!

Shown with optional floor stand. The stand adjusts to two heights and features locking casters.

2x

Twice the writing space without flipping!

Simply scroll and go!

Since the PLUS Scroll Board doesn't flip, it can be mounted on a wall without losing any of the writing surface.

PLUS

The evolution of the whiteboard! **PLUS Scroll Board**

The writing surface scrolls horizontally with a simple push of the hand.

Benefits of the scrolling surface.

1. The board does not require any additional space in order to bring the writing surface on the back to the front.
2. You can use both writing surfaces in succession, without having to take the time to flip over a cumbersome panel.
3. The simple and quick scroll action permits a better flow of conversation.
4. If you need to hide confidential or sensitive information, this is quickly done by scrolling your writing to the rear of the board.

Wall mount or use with a floor stand.

1. The scrolling surface design allows the board to be mounted while still permitting access to both front and back writing surfaces. (The wall mount kit is included with the board.)
2. A floor stand is sold separately. The stand is adjustable to two heights.

Scroll Board - Model 340 | Optional Stand
Product No. 624-630 | Product No. 624-631

Specifications

Number of Panels: 2
Writing Panel Size: 47 W x 34" H
