

1. Exclusive Micro-Processor Inside.

Performs 10,000 diagnostics per second to ensure the entire electronics system is fully functional.

2. Worlds Only DLSC™ Technology.

Protects your hearing from loud noise while magnifying fainter sounds. The electronics never "cut out" or "clip" providing you complete awareness of your working or play environment.

3. Fully enclosed, Military Grade Circuit Boards.

Increases reliability in harsh environments.

4. Gold Connectors.

Provides audiophile sound quality.

5. LED Alert Light Indicator on Circuit Board.

Provides visual proof that your Pro Ears are working properly.

6. On-Board, Computer controlled Auto-Shut Off.

Extends battery life so your Pro Ears work when you need them.

7. Low Battery Indicator.

The audio signal provides advance warning about battery strength and prevents surprises. Change your batteries when it is convenient - avoid losing power when it's most needed.

8. Fastest 'Attack Time'

With a reaction and recovery time of 1.5 milliseconds, less than a typical pause between words in normal conversation, the system greatly enhances your awareness of your environment while simultaneously protects your hearing from loud noise.

9. Automatic & Programmable Gain Control (AGC™).

Harmful noise levels are kept to within 80 dB. The incredible 50 dB of gain allow the faintest sounds to be magnified up to 8x. Hear clearer, hear further. Two separate settings in each cup allow the user the ability to further adjust each circuit board to meet specific hearing requirements.

10. True Stereo.

Each Pro Ears electronic unit is made with independent circuit boards in each ear piece to provide you with the highest degree of quality stereo sound. Stereo sound is necessary for the wearer to pinpoint the origin and direction of every sound. We utilize the most advanced technology available to increase your awareness of your environment.

11. Independent Volume Controls.

With separate, independent controls the wearer can adjust each cup for hearing disparity or situational preference. There are no wires connecting the cups to snag or break.

12. Special Replaceable, ProForm Leather™ Ear Seals.

Provide the ultimate in comfort and conformity for a tight noise elimination seal. No plastic, no vinyl, no sweat.

13. Adjustable, Padded Headband.

Provides the ultimate in comfort and adjustability. Better fit ensures better performance.

14. Modular Design.

Each unit conveniently folds into itself for easy storage/carry.

15. Slim Line, Chop Side and Mag designs.

Specific designs for your specific hearing protection requirements.

16. 200 hours minimum battery life.

Common 'N' Size Alkaline provides long battery life and saves you money.

17. Comprehensive Warranty.

Our comprehensive warranty shows we stand behind our quality and durability to give you peace of mind. The best warranty in the industry.

18. Proudly MADE IN THE USA.

If anything ever does go wrong your product can be diagnosed, repaired and returned to you quickly, generally within 48 hours. 'Made in the USA' means the best.
