STYLE: TRANSITIONAL COLLECTION
DIAMETER: 52" WITH 5 BLADES
MOTOR WARRANTY: LIMITED LIFETIME - ENERGY STAR APPROVED

MOTOR

- The best made import motor, built to Emerson specifications and quality requirements.
- The large 188 x 15mm, 16-pole motor size gives highly efficient performance and RPM capability.
- Both horizontal and vertical balancing is done to ensure total fan balance and quiet operation.
- The motor is hot varnished for longer life and the stator is preheated to ensure an evenly insulated motor.
- High quality, shielded stainless bearings and precision copper wire are used in this motor.
- Quiet operation is ensured with a single capacitor start and a double capacitor speed control.
- Quick connect plug allows for easy servicing of speed control and reversing switch.

HOUSING

- High quality, carbon stamped steel fan housing, switch cup and ceiling canopy.
- Light fixture adaptable

BLADES

- High quality wood blades, some with gloss finish.
- Blades set are micro-balanced to within one gram.
- Y52 accessory blades available.

HANGING SYSTEM

- Hanging ball and bracket are both made of die-cast zinc for durable wear. The industry uses a stamped steel bracket and plastic ball, which wears more quickly and does not control wobble.
- 80" wire leads accommodate up to a 6' downrod with no splicing required.
- Extra safe, triple-locking unthreaded downrod system.

CONTROL

- SR400 remote control and SW405 wall control sold separately.

HIGH SPEED ENERGY INFORMATION

- Airflow - 5614 Cubic Feet Per Minute
- Electricity Use - 72 Watts (Excludes Lights)
- Airflow Efficiency - 78 Cubic Feet Per Minute Per Watt
