The Dukane Mobile Presentation System (MPS) is a fully integrated audio visual solution for schools, training centers, or businesses that are looking for portable presentation technology which can be easily moved between a number of rooms. This all in one system provides users with all the latest in presentation technology in a secure mobile workstation. If desired, users simply connect their laptop or desktop PC to the provided computer and audio cables and they are ready to present.

When not in use all shelves and doors close and lock for complete security and worry free storage. The system comes fully assembled and connected making this a flexible and easy solution for all multimedia requirements.

MPS2

The MPS2 comes with a touch screen interactive remote control system for easy handheld operation of all your multimedia equipment. This customized IR remote allows you to view and operate your entire MPS including your document camera, DVD/VCR player, and projector.
