CALIFONE®

THE SIGHTS & SOUNDS OF EDUCATION

PresentationPro™

Model PA310

PA gear needs to be rugged and versatile, whether it's used inside or outdoors, hooked up to a smart-phone, tablet, computer, projector, or simply needed for straight forward voice amplification.

The variations are endless and the flexibility built into the PresentationPro makes this PA work-horse a good investment. It's built for fast and easy set-ups so you don't need an engineering degree in order to turn it on and start the presentation.

With an increasing number of businesses, schools, houses of worship, conference facilities installing projectors and interactive whiteboards into classrooms on a district wide basis, the need has never been clearer to complement these systems with a high-quality speaker that engages the audience. And with more technology-based activities such as Skype sessions Google+ Hangouts, Facetime, creating videos, podcasting, or simply replaying content from a mobile device, having a good speaker in the classroom is essential.

The PresentationPro is powerful enough so a single speaker can be used in each classroom, minimizing installation time and costs.

Included Infrared volume / mute remote magnetically attaches to the top of the speaker to prevent it from becoming lost

Tripod mounts directly into the underside of the PresentationPro

Shown with optional MB-PA3W mounting bracket. PA310W kit includes the bracket

PresentationPro™

Model PA310

THE SIGHTS & SOUNDS OF EDUCATION

1. Rugged steel-reinforced handle for easy mobility
2. Volume up / Mute / Volume down controls
3. Volume inidicator
