

POLYSLAB™ PUMP COVER

PATENT PENDING

Quality • Light Weight • Recycled

Designed in consultation with major Australian and International pump manufacturers
PATENT PENDING

Stackable design, reduce warehousing and transport costs

Water resistant cooling vents, allows for hot air to escape and cool air to be drawn in

Easy to follow, cut and snap entry points for easy installation of pipes

Multiple points to secure the Pump Cover to the supplied POLYSLAB base to keep it locked safely into place

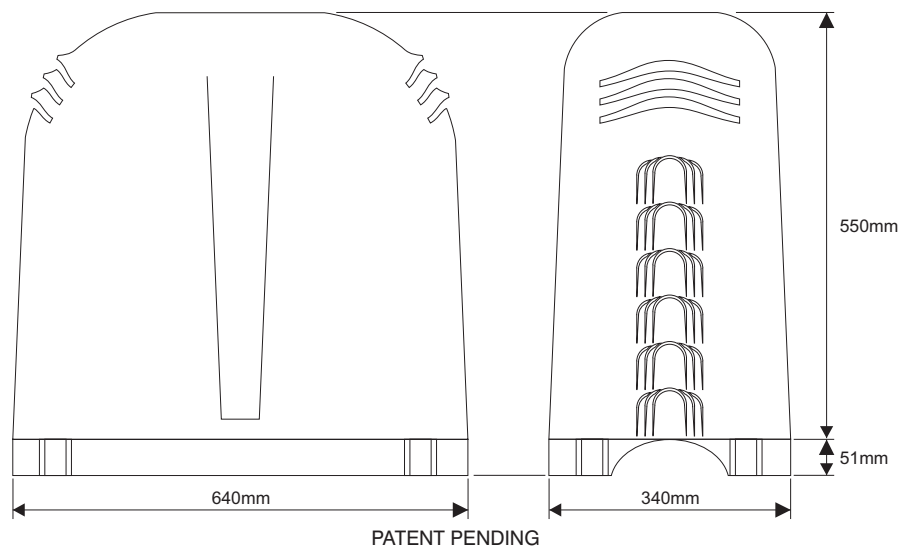

Specifically designed to allow water to escape the cover in case of pipe failure

Combo includes POLYSLAB base (easily removed if required)

- Rated to over 120kg
- Easy to install and eliminates the need to use heavy and hard-to-handle concrete
- Pump/equipment can be easily secured to the base
- Base raises the pump safely up off the ground

- Combo includes **POLYSLAB** base (easily removed if required)
- Multiple ventilation points for flow through ventilation
- Easy to follow cut and snap entry points (allowing for common pipe dimensions)
- Designed to raise the pump off the ground
- Designed in consultation with major Australian pump manufacturers
- Caters for majority of domestic and light industrial applications
- Complete colour range available on request, subject to minimum quantities
- We use only the highest quality material for all of our products. We also pride ourselves on using recycled materials in all of our products where possible.

Designed to protect your investment and your warranty.
