**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Capt. Henry E. Marx

Dear Brian Casey,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear James Cafferty,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). Dear James Fredericks,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear Stanley M. White, P.E.,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Darryl Wright,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Steven Dellarocca,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Brook West,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Dr. Gino Bottino,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Scott Beim,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear Katrina Niehaus,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can't be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner's manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang's Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Beth Estrin,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Robert Kolb,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Sir or Madam,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear Jon Favreau,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

Dear Jon Favreau,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear Tina Su,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Mark Bodie,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Capt. Henry E. Marx

Dear Charles Favreau,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear George Kern,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. Dear Amber Williams,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Stephanie Baird,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear William F Sutton,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Judy Bingaman,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Dan O'Brien,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

Dear Ssu-Yen Huang,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). Dear Barry Starke,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear R.A. 3087,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Jeff Burton,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. July 25 2014

Dear Owen Andrews,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Paul Neuhoff,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

July 25 2014

Dear Barry Thorpe,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear Grant Maisey,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Michael Reiter,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Capt. Henry E. Marx

Dear John C Watkins,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear Eugene Parent,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). Dear Scott May,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Peter Praprotnik,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Tom Farnsworth,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Eric Darscheid,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

Dear Nicholas Covell,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Anthony Larson,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). Dear Michael Jackson,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. July 25 2014

Dear Jo & Gregg Fettin,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Dennis Mills,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Thomas Piatt,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

Dear James Porter,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. July 25 2014

Dear Greg Boggio,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. July 25 2014

Dear Ted Williams,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Paul Straten,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Capt. Henry E. Marx

Dear Todd Kaastad,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear Kevin Lee,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). Dear Dung Nguyen,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Lori Hanson,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Margaret Upton,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Cynthia Galieto,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Samuel Gingrich,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Timothy Cosgrove,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear Steve McKeon,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Louis Dambrosio,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Tom Blake,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. July 25 2014

Dear George Ulrich,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Chris Robinson,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. July 25 2014

Dear Andrew Staniar,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

July 25 2014

Dear Michael Alberino,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear David Muller,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Capt. Henry E. Marx

Dear Edward Cardoza,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear Daniel Snyder,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). Dear Stephen Robinson,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear William Rose,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear James B Murphy,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Ramiro Albarran,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. July 25 2014

Dear Martin Jacobson, Esq.,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. July 25 2014

Dear Gus Dupont,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear Amy Tyson,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

July 25 2014

Dear Marty/Andy Liljequist,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear William Raincsuk,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear John Wuensch,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

Dear Joseph Brown,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

July 25 2014

Dear Bernard Collins,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear Derek Van Zandt,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Tom Shapiro,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Capt. Henry E. Marx

Dear Thomas Russo,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear Michael Shea,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. July 25 2014

Dear James Hagedorn,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Jeffrey Easton,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear George Kirkham,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear Brock Osborn,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear Robin Fischer,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. July 25 2014

Dear Jim Clayton,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). Dear Rodger Costello,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. July 25 2014

Dear Harry Kramer,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Marc Schule,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear Taine Pechet,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear John Cummiskey,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Jay Abel,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. July 25 2014

Dear James Wilson,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. July 25 2014

Dear Brian McMahon,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Capt. Henry E. Marx

Dear Alan Williams,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear Anthony Scott,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear James S. McHutchison,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Mark Bowen,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Peter Iovino,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Steven Hantzis,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear George Bott,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Hamilton Moses III,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). Dear Richard W Virtue,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. July 25 2014

Dear Walt Flowers,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Mack Woods,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Mark W. Preston,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear David Smith,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

July 25 2014

Dear John Tesdorpf,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

July 25 2014

Dear Mike Donate,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Charles Entenmann,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Capt. Henry E. Marx

Dear Chris Walsh,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear Richard Dwyer,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. Dear Moray Dewhurst,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear Joseph Magnant,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear David Cohen,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear John Monter,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear David Scherer,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Walter Borowski,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Laura Barnes,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear Jeff Branan,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Sir or Madam,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Mark Little,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. July 25 2014

Dear Greg Fischer,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Michael Greenwald,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

July 25 2014

Dear Thomas Hughes,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear Phillip Dean,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear William Stireman,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Capt. Henry E. Marx

Dear Clark Phelps,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear Larry Hassler,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. July 25 2014

Dear Mike Donate,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear David McKee,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Peter L. Baron,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Matthew Gallagher,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear Jim Lett,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. July 25 2014

Dear Robert Devine,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). Dear Georgia Hall,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. July 25 2014

Dear Robert Sanders,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Richard Price,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. Dear Thomas Turner,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear William Ludwick,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

July 25 2014

Dear Steve Behringer,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. July 25 2014

Dear Gary Imdieke,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Tim Baumgarten,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Capt. Henry E. Marx

Dear Ken Kontowicz,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear Carol Caldwell,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear John Moran,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear Randy Jensen,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Taylor Beattie,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Natalie Panelli,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Mike McCue,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear David Doyle,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. Dear Charles Hervilla,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. July 25 2014

Dear James Nelson,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Andrew Llanos,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Chris Wood,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

July 25 2014

Dear Austin Stephens,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Dear Stephen Seal,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). July 25 2014

Dear Erin Wright,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Jennifer Marshall,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Capt. Henry E. Marx

Dear Erik Soper,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Dear Richard Patana,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). Dear David Pope,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

July 25 2014

Dear Ken L Larson,

**Mustang Survival Issues a Safety Recall
on their Rescue Stick Models MRD100, MRD101, MRK110, MRK120, MRK130**

Landfall would like to notify you of a safety recall for the Mustang Survival Rescue Stick and the associated Rescue Kits. They are voluntarily recalling all model numbers MRD100, MRD101, MRK110, MRK120, and MRK130 sold in the United States. Mustang recently identified a manufacturing inconsistency on some MRD units that prevent the CO2 cylinder in the foam handle from fully seating against the inflator mechanism. This results in a lower than designed buoyancy level when automatically inflated. Landfall's records indicate that you may have purchased the above-mentioned product.

This issue can easily be corrected through the installation of a new re-arm kit (IE: replace the foam handle/CO2 cylinder assembly with a new assembly). Please note that re-arm kits (MA7206) are not affected by this recall.

Please see the Instructions below

STEP 1

Check if your CO2 handle is new and OK:

- If you see a yellow dot on the end of the CO2 handle(see Image 1), your Rescue Stick contains a good CO2 cylinder handle assembly, is not part of this recall, and is OK to use.
- If no yellow dot is present, proceed to Step 2 below.

STEP 2

Check if your CO2 handle is OK based on manufactured location:

- Check the small "Made in _____" label on the inside of the Rescue Stick fabric cover (see image 2).

Note: You only need to open the outer cover enough to visually inspect the label. You do not need to completely unpack the Rescue Stick.

- If label indicates Made in Canada or Made in USA, your Rescue Stick contains a good CO2 cylinder handle assembly, is OK to use, and is not part of this recall even if it does not have a yellow dot on the handle end.
- If the label indicates any other country than USA or Canada, AND the handle does not have a yellow dot, proceed to step 3.

STEP 3

Contact Customer Service:

- If steps 1 & 2 do not confirm that your Rescue Stick is OK to use, immediately discontinue use of your device, and contact Mustang Survival Customer Service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or emailing RescueStick@mustangsurvival.com
- You will be supplied with a new rearm kit, free of charge, containing a new CO2 cylinder handle assembly for each of your affected Rescue Sticks.
- You will not need to return your product to Mustang Survival.
- On receipt of your new rearm kit(s), proceed to step 4.

STEP 4 – Rearm your device:

- Prior to installing your new rearm kit, manually inflate the Rescue Stick using your current CO2 cylinder handle assembly (by pulling the red “Jerk To Inflate” tab) to ensure that it is emptied and can’t be used in future.
- Next, re-arm the Rescue Stick and re-pack it (see owner’s manual for instructions). A video is available at <http://mustangsurvival.com/rescue-stick-advisory> Mustang Survival appreciates your attention to this important matter. If you have any further questions regarding this advisory, please contact customer service at 1-800-526-0532 between the hours of 7:30am-4:30pm PST, or email your enquiry to RescueStick@mustangsurvival.com

Consumers should NOT return product to Landfall.

If you have questions, please first refer to the Frequently Asked Questions section on the Mustang website at <http://mustangsurvival.com/rescue-stick-advisory>

Landfall will continue to take orders for Mustang’s Rescue Stick, all new orders will ship as the non-recalled items. Landfall wants to provide our customers with the safest boating experience possible and we sincerely apologizes for the inconvenience of this recall. We are committed to always offering the most current information regarding the products we sell.

Thank you for your patience and understanding.

Capt. Henry E. Marx
