

## Assembly Instructions for Training Tables

### **Assembling for Individual Use:**

- Lay table face down in a carpeted area, or on carboard for protection during assembly.
- Line up 4 corner holes from the leg to the 4 holes on the underside of the table. Use 4 screws to attach. (6 holes may be shown on leg bracket, but you only need to screw in the 4 corner holes for assembly).
- Repeat process for each leg.

### **When "ganging" tables together:**

- Butt the two table edges together and center leg bracket over the seam to attach.
