1.) Assemble on carpet or cardboard to protect parts during assembly. Assembly will require 2 people for safety.

2.) Insert all wood dowels, cam pins and cam locks on the Desktop and Side Panel. Then, connect the two panels together by lining up the holes with the dowels & pins. Insert cam pins into holes that align with cam locks. Twist cam locks with a Phillips Screwdriver to secure the connection.

3.) The next step is to attach the bridge between your desks. Locate the 2 Worksurface brackets (they may already be attached on the ends of the Desktop. If not, use the M6 Machine Screws to attach, centered over the edges of the Desktop like shown in drawing.)

Special Note:
Location & number of cam pin, cam lock and dowel holes may vary.

4.) Determine if the bridge will go on the left or right side of your desk. With a helper, have one person hold the bridge steady while the other person attaches the Worksurface Brackets to the undersides of the front desk & back credenza.

5.) Once installed & leveled, use the wood screws to install the offset side panel brackets. This will further secure the side panel, but is an optional step. A power screwdriver is helpful.

6.) Lastly, insert the grommet into the desktop and use the caps provided to cover the cam locks.
