Helpful Tips:
Assemble on carpet or on cardboard box to avoid damage during assembly.

Assemble in area of planned use for the desk. Avoid dragging assembled desk.

1.) Locate the two front panels and lay them face down. Insert cam pins and leveling glides.

2.) Locate the spacers for the front panels and insert dowels and cam locks.

3.) Using a screwdriver, turn the cam locks on the spacers clockwise to lock/attach the spacers to the front panels.

Tools needed:
- Phillips Screwdriver
- A helper

4.) With a helper, set the glass front panel, smooth side down, on front panels as shown. Line up the holes of the panel with the holes on the spacers.

5.) Next, insert the metal threaded dowels into the holes. Then set one clear rubber washer over each dowel. Finally, screw the chrome metal discs over the dowels.

6.) Next, locate the desktop and insert all of the hardware.

7.) Insert desktop like shown. Insert all cam locks and PARTIALLY TIGHTEN. DO NOT YET FULLY TIGHTEN.
8.) Locate one of the side panels, insert hardware and attach to front panels and
desktop. DO NOT FULLY TIGHTEN YET!

9.) Repeat process with other side panel.

10.) Now, tighten down all cam locks on desktop, side panels and front panels.

11.) With a helper, carefully turn the desk upright.

12.) The next step is to attach the glass counter top. The counter top will have metal discs
adhered already. Turn the counter disc side up and insert one cam pin per disc.

13.) Set counter top on desk, lining up the
cam pins with the holes.

14.) Insert cam locks that align with those cam pins, and fully tighten down.

15.) Insert the desktop grommets
and any cam lock covers as your last step.

Care & Maintenance:

Use a damp and/or soft cloth to clean. Regular glass
cleaner can be used on the smooth, non-frosted
side of the glass.

1
Step 1:
Determine if return desk is to be Left or Right.

Step 2:
Attach Side Panel and Support Panel using dowels, cam locks and cam pins provided.

Step 3:
Using M6 Screws, attach flat bracket to edge of return as shown in the photo, centering it over the edge.

Step 4:
Using wood screws provided, attach both side panel offset brackets to the side panel as shown.

Step 5:
Screw in floor glides.

Step 6:
Carefully turn over return desk and attach to main desk using M6 screws, connecting other side of flat bracket to underside of main desk.

Step 7:
Insert grommet and covers. Shallow covers go over cams on side panel, deep covers go over cams on support panel, since those are more inset.
