Tools Needed:
- Phillips Screwdriver
- A helper!

1.) Assemble on carpet or cardboard to protect parts during assembly. Assembly will require 2 people for safety.

2.) Locate left & right side panels. Screw in the leveling glides by hand. Then, insert wood dowels & cam pins. The wood dowels fit into the slightly larger holes, compared to the cam pin holes.

3.) Locate front panel and insert all cam locks on the left & right sides. Then, align one of the side panels and connect the panel by inserting the cam pins into the cam locks and the dowels into the corresponding holes. (see diagram on next page). Twist the cam locks with a Phillips Screwdriver to secure.

4.) Next, insert all cam pins, dowels and cam locks on the top edges of the side panels and front panels. Locate the desktop and with a helper, carefully set the desktop on top of the assembly shown above. Twist cam locks to secure the connection.

5.) Your last step is to insert the grommet(s) provided into the desktop. Cover the cam locks with the caps provided.

Special Note:
Location & number of cam pin, cam lock and dowel holes may vary.

1.) Install 4 leveling glides. Keep the front two leveling glides 1/4” taller than the back two, which means your file will be slightly tilted back. This is the proper way to level a lateral file cabinet. It keeps any unlocked file drawers from creeping open and distributes the weight more evenly.

2.) Use the screws to attach drawer pulls.
