<tbody>
<tr>
<td>Leveling Glide</td>
<td>3/4&quot; Bolt</td>
</tr>
<tr>
<td>2-1/2&quot; Bolt</td>
<td>Bracket (for return desks only)</td>
</tr>
<tr>
<td>Grommet</td>
<td></td>
</tr>
</tbody>
</table>

Tools Needed:
- Allen Wrench included (to connect bolts)
- Power Screwdriver
- A Helper

Desk or Credenza:
1.) Assemble on carpet or cardboard to protect parts during assembly. Assembly will require 2 people for safety.

2.) Screw in leveling glides on all frames.

3.) Next, assemble metal desk frame by attaching the cross beam to the left & right side legs. The bolts for the cross beam are already in the legs. Just back out, place beam and screw back in. Use 16 of the 3/4" bolts total for this step, 8 for each side.

4.) Use a total of 4 of the 2" Bolts to attach the metal frame to the worksurface. Once connected, insert the grommets.

5.) If you purchased an L-desk, attach the return desk end leg to the desktop with 2 more 2" Bolts, that are taped to the leg.

6.) The mounting bracket will already be installed on the return desktop. Use a total of 6 of the 3/4" Bolts to attach the bracket to the underside of the two worksurfaces.
