Trendspace Series - Assembly Instructions
66" & 71" Desks
66" & 71" L-Desks

1.) Assemble metal frame by attaching cross beam. Screws for cross beam are already in the legs. Just back out, attach beam and screw in.

2.) Next, attach the desktop with the screws from the hardware bag (found taped on one of the legs.)

---

If an L-desk was purchased, follow instructions below.

1.) Assemble return desk by attaching desk top with screws provided in hardware bag, taped to the leg. The return will assemble the same whether its a left or right return.

2.) The mounting bracket will already be installed on the return desktop. Use the matching Phillips head screws to attach to the main desk on the side of your choosing.
Note: Holes are not predrilled on the underside of the worksurface due to the self-threading design of the pointed tip, coarse thread wood screws provided. The four wood screws will ensure a strong hold when screwed directly into the wood.

Positioning of the modesty panel is left to the personal preference of the user. It can either be placed flush to the front edge of the desk, or, set back several inches from the front edge.

Step 1: Modesty Panel is easiest to attach when desk is upside down. Attach the two angled brackets to the modesty panel itself with the four bolts and washers provided. Screw silver caps on other side of panel once done.

Step 2: Next, measure your desktop and determine if you want your panel to overhang, be flush with, or be inset from the edge of the desktop. Line up modesty panel and mark holes where the angled bracket will attached to the underside of the desk.

Step 3: Using a screwdriver or drill, attach the bracket by screwing the pointed wood screws into underside of the desk, over the marks. Once done, with a helper turn the desk upright.
66" & 71" White Desktop Risers

WH2095 & WH2090

PARTS LIST

Assemble on a smooth, clean surface to prevent scratches.

1.) First, attach FRONT PANEL to one of the SIDE PANELS using the cam lock and cam pin sets provided. DO NOT YET FULLY TIGHTEN DOWN THE CAM LOCKS. That will be towards the end.

2.) Next, attach the other SIDE PANEL using same method.

3.) Now, insert any/all wooden dowels, cam locks and pins into the FRONT PANEL to attach the TOP COUNTER.

4.) Once all panels are connected, fully tighten all cam locks.

5.) Place in area of intended use and use covers to cover over the cam locks.

6.) Double Sided tape on bottom of side panels secures the riser to the desktop.
