1.) Assemble on carpet or cardboard to protect parts during assembly. Assembly will require 2 people for safety.

2.) Locate left & right side panels. Screw in the leveling glides by hand. Then, insert wood dowels & cam pins. The wood dowels fit into the slightly larger holes, compared to the cam pin holes.

3.) Locate front panel and insert all cam locks on the left & right sides. Then, align one of the side panels and connect the panel by inserting the cam pins into the cam locks and the dowels into the corresponding holes. (see diagram on next page). Twist the cam locks with a Phillips Screwdriver to secure.

4.) Next, insert all cam pins, dowels and cam locks on the top edges of the side panels and front panels. Locate the desktop and with a helper, carefully set the desktop on top of the assembly shown above. Twist cam locks to secure the connection.

5.) Your last step is to insert the grommet(s) provided into the desktop. Cover the cam locks with the caps provided.

LOCK

MAKE SURE THE ARROW IS
POINTING UPWARDS
BEFORE INSERTING INTO
THE HOLE.

Step 1:
Attach the Left & Right Side Panels to the bottom Cross Brace using (A) Cam Pins and (B) Klix Cams. Turn the Klix Cams with a Phillips screwdriver 1/4 turn to the right to lock together.

Step 2:
Insert (C) Dowels into holes as shown. Then, insert the frosted glass panel.

Step 3:
Attach the Counter Top using (A) Cam Pins and (B) Klix Cams along the Side Panels and (C) Dowels to hold the glass in place. Twist (B) Klix Cams to secure.

Step 4: Peel the backing off of the double sided tape that is located on the bottom of the Cross Brace. Press the riser down on the surface of the desk to adhere the riser. The double sided tape is a firm adhesion.

1.) Assemble on carpet or cardboard to protect parts during assembly. Assembly will require 2 people for safety.

2.) Determine if the return will be left or right handed (see diagram next page). Locate Side Panel & End Panel and arrange like shown in drawing. Insert leveling glides, then insert all cam pins, cam locks and wood dowels. Then connect the panels by inserting the dowels into the holes on opposite panel and inserting cam pins into cam locks (see diagram). Then, twist the cam locks with a Phillips Screwdriver to secure connection.

3.) Next, locate the Desktop and insert hardware. Then, set the desktop on the lower assembly and twist cams to securely connect.

4.) Now it’s time to attach the return to your desk. Locate the large flat bracket and M6 machine screws (it may be attached to the desktop already. If not, center the bracket over the edge and install 4 of the screws). With a helper, have one person hold the return desk stable while the other screws the machine screws into the desk.

5.) Once installed & leveled, use the wood screws to install the offset side panel brackets. This will further secure the side panel, but is an optional step. A power screwdriver is helpful.

6.) Lastly, insert the grommet into the desktop and use the caps provided to cover the cam locks.

Special Note:
Location & number of cam pin, cam lock and dowel holes may vary.
