Special Note:
Location & number of cam pin, cam lock and dowel holes may vary.

1.) Assemble on carpet or cardboard to protect parts during assembly. Assembly will require 2 people for safety.

2.) Determine if the return will be left or right handed (see diagram next page). Locate Side Panel & End Panel and arrange like shown in drawing. Insert leveling glides, then insert all cam pins, cam locks and wood dowels. Then connect the panels by inserting the dowels into the holes on opposite panel and inserting cam pins into cam locks (see diagram). Then, twist the cam locks with a Phillips Screwdriver to secure connection.

3.) Next, locate the Desktop and insert hardware. Then, set the desktop on the lower assembly and twist cams to securely connect.

4.) Now it's time to attach the return to your desk. Locate the large flat bracket and M6 machine screws (it may be attached to the desktop already. If not, center the bracket over the edge and install 4 of the screws). With a helper, have one person hold the return desk stable while the other screws the machine screws into the desk.

5.) Once installed & leveled, use the wood screws to install the offset side panel brackets. This will further secure the side panel, but is an optional step. A power screwdriver is helpful.

6.) Lastly, insert the grommet into the desktop and use the caps provided to cover the cam locks.

Step 5

4.) Your next step is to attach the hutch doors. See Figure “B” which identifies the Outside Doors and Inside Doors. There are different hinges that connect the inside & outside hinges. See Figure “A” to help identify. Attach two hinges per door. Use the hinges with the ‘bump’ on the Outside Left & Right Doors and the flat hinges on the Inside Left & Right Doors. The holes are piloted. Use the screws provided. Once the hinges are attached, slide the hinges over the Hinge Brackets, fitting the screw head of the Hinge Bracket in the slot of the Hinge. Once fitted, slightly tighten the set screw. Now, set your hutch on your desk. Use the double-sided tape to securely adhere to desktop.

5.) Next, it is time to adjust the doors so that they properly align. Using your screwdriver, turn the Set Screw on the hinge to adjust the depth and the screws on the hinge plate to move the door up/down.

6.) Last step is to install Cam Lock Caps and Grommet cover.
