1.) Assemble on a smooth, carpeted floor to prevent scratches or damage. Assembly will require 2 people for safety.

2.) Screw 2 leveling glides in completely on both side panels. When completed, the glides can be adjusted outward to level the desk on uneven floors.

3.) Next, take out the front panel and position with side panels like shown on page 3.

4.) Insert wood dowels into large holes and cam pins into smaller holes. Align the panels together and attach using a Phillips Screwdriver to twist the cam locks to secure.

(Number of holes in diagram may vary from actual desk)
5.) Lower Desktop onto front and side panels, making sure to align holes. Twist any remaining cam locks to secure.

6.) L-brackets and screws are optional and can be placed anywhere underneath the desktop for additional strength. Screws are self-drilling.

7.) Install grommets. Note: Credenza Shells have only 1 grommet.

8.) Lastly, pop in any cam lock covers over the silver cam locks.

Further adjustment of the leveling glides may be needed if desk is not level.
Reversible Bridge for U-Desk

Can be used in left or right configuration

1.) Assemble with desktop face down on carpet or cardboard for protection during assembly.

2.) Attach long, worksurface brackets to underside of bridge. Use round-head screws to attach. Insert all/any hardware on worksurface.

3.) Insert any cam locks, cam pins and dowels to the side panel. Connect side panel to top panel using cam locks and pins. Use a Phillips screwdriver to twist the cam locks to secure.

4.) Screw in leveling glides on side panel.

5.) Carefully turn unit upright. Place in U-desk where you wish to connect. Level the desk if needed. Connect the worksurface brackets on the bridge to the front desk and back desk using same round-head screws.

6.) Using pointed wood screws and bent side panel brackets, connect the bridge side panel to the side panels of the front desk and back desk. Center bracket over the seam.

7.) Insert the shallow covers over the cam locks. Insert grommet in desktop.

</table>

1) Install 4 leveling glides and level the file
2) Install drawer pulls with screws provided.

To attached under desk (optional):

1.) Remove 1 or 2 of the box drawers by locating the black tabs in the left & right side of the drawer. Pull up on one tab, push down on the other to unlock from the track and remove drawer.

2.) Use 4 bolts provided to go through the top of the file into the threaded holes on the underside of the desk.
