Desk/Credenza Shell Assembly Instructions

Special Note:
Location & number of cam pin, cam lock and dowel holes may vary.

1.) Assemble on carpet or cardboard to protect parts during assembly. Assembly will require 2 people for safety.

2.) Locate left & right side panels. Screw in the leveling glides by hand. Then, insert wood dowels & cam pins. The wood dowels fit into the slightly larger holes, compared to the cam pin holes.

3.) Locate front panel and insert all cam locks on the left & right sides. Then, align one of the side panels and connect the panel by inserting the cam pins into the cam locks and the dowels into the corresponding holes. (see diagram on next page). Twist the cam locks with a Phillips Screwdriver to secure.

4.) Next, insert all cam pins, dowels and cam locks on the top edges of the side panels and front panels. Locate the desktop and with a helper, carefully set the desktop on top of the assembly shown above. Twist cam locks to secure the connection.

5.) Your last step is to insert the grommet(s) provided into the desktop. Cover the cam locks with the caps provided.

1.) Assemble on carpet or cardboard to protect parts during assembly.

2.) First attach the Front Panel to one of the Side Panels using the cam lock/pin hardware provided. DO NOT FULLY TIGHTEN THE CONNECTION! Leave yourself wiggle room for the coming steps.

3.) Repeat process for the other Side Panel.

4.) Next, insert any/all wooden dowels, cam locks and pins into the Front Panel and Side Panels to connect the CounterTop. Set Countertop on top of the assembly, over the pins & dowels.

5.) Once all parts are connected, tighten down all of the cam locks.

6.) With a helper, carefully lift the assembled Riser onto your desk. Remove the backing of the double sided tape at the bottom of the Side Panels and carefully place the riser down. After 24 hours, the tape will have a firm hold and the riser cannot be removed or budged.

7.) Cover any cam locks with white cam lock cover stickers.

Special Note:
Location & number of cam pin, cam lock and dowel holes may vary.
