

STALKER II

Ballistic Operator Helmet

KEY FEATURES

- High Cut side walls to allow for use of Comm gear
- High Cut shell provides the same amount of head coverage/size as the MICH 2002 "Gun-Fighter" model
- Includes "Triple S" NVG Shroud, bungee lanyards, integrated chinstrap
- Lightweight, multi-impact, ventilated liner with repositionable "Hex" pad system made of closed-cell comfort foam that is not affected by temperature, altitude, or moisture
- "Clockwise" adjustable suspension system with replaceable front, nape, and side pads quickly detaches to allow convenient donning and doffing of COMMs headsets with headbands
- Integrated "Easy Adjust" retention system gives the helmet 4x more stability than standard issue ACH helmet suspension and retention products
- Comes standard with MARSOC/WARCOM night vision 3-hole mount pattern

Solid Colors

Hydo-Dipped Patterns

BATTLEGROUND TESTED DESIGN

The "Stalker II" Ballistic Operator Helmet system, designed and produced to replace the older model MICH 2000, and 2001 helmets. The "Stalker II" provides improved performance with reduced weight over the previously issued helmets. The base material of the helmet is a state-of-the-art para-aramid that utilizes a unique construction resulting in increased ballistic protection. Our comfortable "Hex" Pad Suspension, in combination with a four point "Easy Adjust" retention system, allows for several adjustments to achieve a snug and extremely comfortable fit. The use of an H-style nape pad in the 4-point retention makes the helmet very stable even when using Night Vision Goggles (goggles sold separately). The "Stalker II" integrates with Phalanx's "Easy Adjust" Suspension System, "Para-Rails" Helmet Rail System, "TAC One" Headset and "TAC TWO" Headset for tactical communications and increased hearing protection.

The "Stalker II" operator helmet is offered in 2 sizes, M/L and L/XL.
