SIZED TO
FIT YOUR
NEEDS.**

Example: Flat layout of standard lumber hauler tarp with rain flaps and tail curtains 1 end (commonly used in pairs), 3 rows of web and dees, bottom spur grommets.

Example: Steel hauler tarp with 2 rows of web and dees, bottom grommets.

Steel Truck Tarps

Manufactured with the highest quality fabrics and with the usual high standard craftsmanship from Tarp Supply. All seams are double lock stitched. D-rings (if used) are heavy, welded style and tack stitched to insure high tension strength. Select any of the fine vinyl coated fabrics or the 15 oz water resistant canvas.

Vinyl Tarps

Our vinyl tarps have high abrasion resistance. High tear strength is excellent for truck, construction, industrial, and agriculture covers. Resists oil, acid, grease and mildew. Spur grommets 24" centers. Available in 10 oz., 18 oz., 22 oz., and 40 oz.

Poly Tarps

We have a large selection of poly tarps. We have blue, silver/black, white, and many more. Our poly tarps are heavy duty, water and mildew resistant and great for all purposes. These poly tarps have grommets on each corner and all the way around the perimeter. We strive for the best quality poly tarps at the best price.

Canvas Tarps

Our canvas tarps are top of the line. We have green, olive drab, brown, tan, and white. We can custom make just about any size. All of our treated canvas tarps are water and mildew resistant. These canvas tarps are made of a heavy gauge brass grommet that won't rust and will last long. Tarp Supply canvas tarps are made in a heavy duty 10oz, 12oz, and 15oz per square yard.

These can be used for many occasions such as agriculture, heavy equipment, construction, and outdoor needs! Our 10oz canvas is made from heavy duty silicon treated polyester and our 12oz and 15oz canvas is made from top of the line duck cotton.

*Samples of all tarps available on request.
Canvas weight before treating.

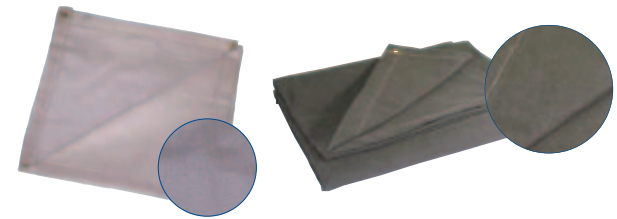

Heavy Duty Tarps

We have a nice selection of heavy duty tarps. If you are looking for something that will last, you need our heavy duty tarps. In order to decide what heavy duty is, you need to look at a few factors. First, you should look at the weight per square yard. The higher the number, the better the quality. Also the weave count is important. A 10x8 weave count is a light weight, whereas a 14X14 weave is heavy duty. Denier and coating is also factors in heavy duty tarps. Denier is the measurement of thickness of a tarp, and the coating will determine how well it will stand up to sun and weather.

Flame Retardant Tarps

Our flame retardant poly tarps offer great strength, and flame retardant to NFPA 701. It's great for anything from indoor curtains to building enclosures. Our flame retardant canvas is also top of the line strength. This flame retardant finish will not support combustion. All double-stitched seams and hems with brass tie-down grommets spaced 24" apart all the way around.

Custom sizes available upon request.

*Flame retardant canvas, standard color — olive drab.
Flame retardant and canvas tarps will not support combustion.*
