When: Call to register (class scheduling to be determined)
1 Day Course: All classes run 8:30 am - 4:30 pm

Where: Kistler Equipment Company
4437 South 139th Street
Omaha, NE 68137

For Scheduling, call Mark McElligott @ 402-896-9090 or e-mail mark@kistlerequipment.com

Lunch and Light refreshments available (lunch is catered)

All personnel responsible for rigging inspection will benefit from this class. Conducted at Kistler Equipment's facility, this course is a combination of classroom and hands-on instruction ensuring maximum learning. This training can be tailored to conform to customer application and scheduling requirements.

Come learn from hoist and crane experts in the industry on how to insure a safe working environment. Participants learn how to properly inspect chain, wire rope and synthetic slings, below the hook lifting devices (OEM and Custom), manual hoists (chainfalls and lever tools) and rigging hardware.

Inspections are performed per OSHA, ASME, and manufacturer's guidelines.

This course is designed for riggers, sales and technicians who only inspect rigging gear.

1 Day Course

In this course, you will learn how to inspect and document inspections on:

- Wire Rope Slings
- Chain Slings
- Synthetic Slings
- Rigging hardware
- Below the hook lifting devices (OEM and custom)
- Inspection of hoists, chain falls and lever tools/come-a-longs
- Review of the requirements of ASME and OSHA

New!

Hands on and written exam will be performed at the conclusion of this training on day 1 to test students comprehension of materials. A certificate of training and rigging inspector wallet card will be awarded.

On-Site Rigging Gear & Sling Inspection Training Available at your location for one or more operating shifts. Call Mark to discuss options.
