

Patrice Baker

Silverfish Studios

Patrice began her jewelry making career under the watchful eyes of Silversmith Pepe Fernandez in Elora Ontario Canada. It quickly became evident that texture was what motivated her creativity. The quest to incorporate other kinds of textures eventually led her to etching in copper, silver and bronze.

When metal clays joined the market, Patrice embraced this fabulous material, and hasn't looked back. Her signature pendants are layers of textured metals, arranged to be completely reversible.

Upon retiring from 30 years of teaching Art and Science to grade 7 and 8 students, she purchased a studio/teaching space perfect for workshops, classes and retreats.

Patrice has such talent and enthusiasm for both creating and for teaching. It is wonderful to find someone who is both inspirational and so willing to pass on all she has learned. I thoroughly enjoyed her class on metal clay and I can't wait to take the next class. L. Howell Milton Ontario Canada

My experience with Patrice was one I will never forget. The time spent at her tranquil studio was both educational and fun and I am looking forward to taking another bronze clay session with her in the near future. K Ross. Niagara Falls Ontario Canada.
