

SmartAlert™ Wireless

Avoid the wiring costs associated with a traditional system by using RATH's SmartAlert Wireless System. The Wireless System requires our SmartAlert Software, PC, Wireless Gateway Receiver, and any combination of our Fixed or Mobile Wireless Devices. Wireless Repeaters may also be required.

Software & PC:

Notification Center
RC200PC

Fixed Devices:

Wireless Pull String
RC1PSWH
(Single Gang)

Wireless Panic Button
RC1PBWH
(Two Gang)

Wireless Bedside Station
RC1BSWH
(Two Gang)

Mobile Devices:

High Power Repeater
RC5040-20T

Wireless Smoke Detector
RC1244-60

Activity Sensor
RC1241-60

Universal Transmitter
RC1210-60

SmartAlert™ Software

The RATH® SmartAlert Software displays calls from all connected and programmed devices. It can be integrated with both the SmartCare Hardwired System and the SmartAlert Wireless System. You can email or text call notifications, manage call logs, resident information, caregiver information, and much more with the SmartAlert Software.

Truly Protecting What Matters.
