

PEDIAKID OMEGA 3 FISH OIL

**Improves Memory, Vision, Concentration – Promotes Healthy Brain Development
Helps Reduce High Cholesterol Level**

Ingredients	Benefits
Nectar of Agave	Exclusive to INELDEA laboratories, and 100 % organic, Nectar of Agave is especially recommended for children, since it consists of unrefined natural sugar with low glycemic index and is non-cariogenic. Agave is a botanical succulent plant that produces a nectar rich in mineral salts with exceptional nutritional qualities. Its sweetening power is superior to any other sugars, yet with fewer calories.
Fructo-oligosaccharides (FOS)	A compound synergized with pre-biotic fibres of Inulin and Oligofructose that have a Bifidogenic effect, favorable to rebalancing the good intestinal flora (Bifidobacteria), thus contributing to a better assimilation of the essential ingredients present in the composition of PEDIAKID, as well as those nutrients contained in food (vitamins, minerals, trace elements...). This exclusive compound is the result of the latest research on organic fibres concerning health issues. It makes possible with a notable increase and a significant degree in the absorption and retention of calcium from food intake.
Natural extracts of Tuna fish oil, vitamins and minerals:	
Fish oil naturally concentrated in EPA & DHA 50 mg which EPA 7.3 mg ratio DHA / EPA 7/1	<p>DHA (docosahexaenoic acid), naturally present in mother's milk, is essential to the development of the brain and vision in the young child. It enters into the constitution of the cellular membranes of neurons and retina. Several studies have shown that new-born babies having received a preparation enriched in DHA had an advantage over others, at both visual and neurological levels (1,2). Hyperactive children or those manifesting lack of attention have low DHA content in their brain. DHA Omega 3 is essential for the cognitive health and cerebral function in children.</p> <p>EPA (acid eicosapentanoic) also contributes to the cerebral functions. It is the precursor of many essential substances which govern the hormonal balance, the immune system, the blood irrigation of tissue and the cerebral function. For maximum effectiveness, the supplements based on fish oil intended for young children must provide DHA in a proportion very much higher than that of EPA (5).</p>
Vitamin A	Vitamin A plays a variety of functions from cellular development, vision, immune defense, bone metabolism, healthy skin to antioxidant activity.
Vitamin E	Vitamin E as tocopherols is a powerful antioxidant that protects the body cells from oxidative stress.
Vitamin C	Vitamin C as ascorbic acid is an essential nutrient for the human body, as it instigates and stimulates the natural immunities against the oxidation of the body cells and protects it against the scurvy disease.
Vitamin D	Rich in vitamin C, Acerola helps to combat external stress while helping to delay the appearance of fatigue.
Magnesium Phosphorous	Magnesium and phosphorous act in synergy as regulators of nervous system and cerebral balance.
Natural Raspberry concentrate	Raspberries contain a large amount of polyphenol antioxidants with potent health benefits against diseases and illnesses. Raspberries are also a rich source of dietary fiber, vitamins B, C, folic acid and natural minerals of copper, magnesium, manganese, iron that will complement a child insufficient daily nutrition.

Directions:

Under 4 years of age: 1 teaspoon after breakfast, and after lunch.
Above 4 years of age: 2 teaspoons after breakfast, and after lunch.

Bottle of 125 ml – ACL: 4292577 – Gencod: 3700225600272
