

## PEDIAKID Bowel Ease

**Helps regulate bowel movements– Gently protects against digestive upsets  
Builds a healthy digestive system**

Ingredients	Benefits
<b>Nectar of Agave</b>	Exclusive to INELDEA laboratories, and 100 % organic, Nectar of Agave is especially recommended for children, since it consists of unrefined natural sugar with low glycemic index and is non-cariogenic. Agave is a botanical succulent plant that produces a nectar rich in mineral salts with exceptional nutritional qualities. Its sweetening power is superior to any other sugars, yet with fewer calories.
<b>Fructo-oligosaccharides (FOS)</b>	A compound synergized with pre-biotic fibres of Inulin and Oligofructose that have a Bifidogenic effect, favorable to rebalancing the good intestinal flora (Bifidobacteria), thus contributing to a better assimilation of the essential ingredients present in the composition of PEDIAKID, as well as those nutrients contained in food (vitamins, minerals, trace elements...). This exclusive compound is the result of the latest research on organic fibres concerning health issues. It makes possible with a notable increase and a significant degree in the absorption and retention of calcium from food intake.
<b>Natural extract of fruits, plants and minerals:</b>	
<b>Fig</b>	Fig is known since antiquity as a fruit that stimulates natural intestinal function in cases of light constipation with no associated illnesses.
<b>Prune</b>	Prune contains a significant quantity of harmoniously divided soluble and non-soluble fibers. Very well tolerated by the system, the soluble fibers have a good ability to retain water and have a beneficial and gentle influence on the intestinal tracts. Non-soluble fibers are more “mechanical”, they stimulate and accelerate the bowel movements.
<b>Artichoke</b>	An alkaline nutrient recommended for digestive and metabolic disorders, Artichoke optimises the system’s functions in order to maintain the metabolic balance of the digestive system. It also disintoxicates and promotes the intestinal regularity while fortifying the immune system.
<b>Tamarind</b>	Originally from Africa, this evergreen tree is cultivated in most tropical regions, notably in India and the Antilles. The pulp of its fruit is used as a gentle laxative: in fact, it acts by increasing the volume of liquid in the lower intestine, and it also possesses the antiseptic properties.
<b>Rhubarb</b>	Rhubarb is recommended for a body tendency to constipation, because its abundant fibres can effectively stimulate the lazy intestine. Thanks to its richness in potassium (the near-absence of sodium), rhubarb also has gentle diuretic properties. It also-reinforces the antiseptic properties of the associated Tamarind.
<b>Magnesium gluconate</b>	Oligo-elements essential to biological stimulation to help regulate digestive and bowel functions.
<b>Potassium iodide</b>	
<b>Natural apple concentrate</b>	Underscoring the maxim “An apple a day keeps the doctor away”, apples are a rich source of fiber content and antioxidant compounds that help regulate the bowel movements and may reduce the risks of colon cancer. Apples have been consumed for their depurative, diuretic and laxative properties.

**Directions:**

Under 4 years of age: 1 teaspoon, after breakfast and lunch  
Above 4 years of age: 2 teaspoons, after breakfast and lunch

For 10 days maximum. To be renewed several times a year, if necessary.

Bottle of 125 ml - ACL : 7897915 – Gencod : 3700225600241
