

PEDIAKID Support Immune System
Stimulates Natural Defense - Improves Physiological Immunity
Helps Fight Stress and Free Radicals

| Ingredients | Benefits |
|--|--|
| Nectar of Agave | Exclusive to INELDEA laboratories, and 100 % organic, Nectar of Agave is especially recommended for children, since it consists of unrefined natural sugar with low glycemic index and is non-cariogenic. Agave is a botanical succulent plant that produces a nectar rich in mineral salts with exceptional nutritional qualities. Its sweetening power is superior to any other sugars, yet with fewer calories. |
| Fructo-oligosaccharides (FOS) | A compound synergized with pre-biotic fibres of Inulin and Oligofructose that have a Bifidogenic effect, favorable to rebalancing the good intestinal flora (Bifidobacteria), thus contributing to a better assimilation of the essential ingredients present in the composition of PEDIAKID, as well as those nutrients contained in food (vitamins, minerals, trace elements...). This exclusive compound is the result of the latest research on organic fibres concerning health issues. It makes possible with a notable increase and a significant degree in the absorption and retention of calcium from food intake. |
| Natural extracts of fruit, plants and minerals: | |
| Propolis | Well-regarded for its beneficial antimicrobial properties against inflammation, it is an immuno-stimulant and an antioxidant against viral diseases and superficial burns. |
| Purple coneflower | Also known for its antiviral properties, it is particularly recommended for its beneficial use during seasonal changes. |
| Acerola and Cynorrhodon | Rich in vitamin C, they act in synergy to delay the appearance of fatigue, to sustain daily intellectual and physical dynamism, while helping the body to ward off against stress and external free radicals. |
| Broccoli | High in vitamins C, K and A, as well as dietary fiber, Broccoli is one of the "healthy-vegetables", most often recommended by nutritionists, because of its potent anti-viral, anti-bacterial and anti-cancer properties and a strong modulator of the body immune response system and heart health. |
| Ginseng | Plant extract used as an adaptogen to increase the body's resistance to fatigue, stress and to recover the vitality, while improving the immunisation of the organism. Due to its energetic properties, Ginseng has the nourishing stimulant and anti-oxidant effects. |
| Copper gluconate | Natural minerals that are used to treat common cold, hypertension and post operative complications play an essential role in strengthening the immunity defence system of the body metabolism. |
| Manganese gluconate | |
| Natural of bilberry concentrate | With high levels of anthocyanin pigments, bilberry concentrate has been shown to lower the risk for several heart and diabetes diseases. In traditional medicine, bilberries were also used to treat certain gastrointestinal ailments. |
