DETENTION HARDWARE

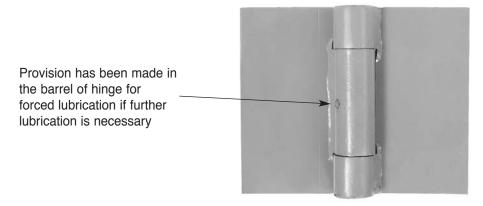

Double Weight Concealed Ball Bearing Prison Hinges

BB855 - (ANSI A8381) - steel with welded pin. Phosphated and prime coated for painting

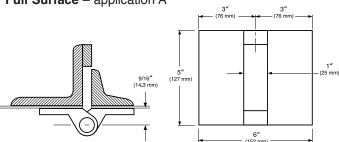

888.634.3667

- · For lead-lined doors to x-ray rooms and other exceptionally heavy doors
- · Made of double weight steel capable of carrying doors weighing up to 800 lbs. (363 Kg) (Based on a 3'x 7' door with 3 hinges)
- Each of the 2 concealed hardened steel races contains sixteen 1/8" (3.2 mm) hardened and ground steel balls which are assembled within a jacket
- Concealed bearings are well lubricated insuring smooth, long lasting operation
- · Rolled knuckles are welded and machined
- Typically made not swaged, no holes (application A) for full surface applications, or for full mortise (applications C) application. All other configurations are made to order

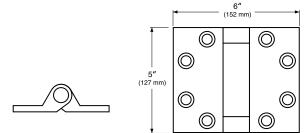

TYPICAL APPLICATIONS OF BB855

Regularly furnished blank no holes, not swaged for Full Surface - application A

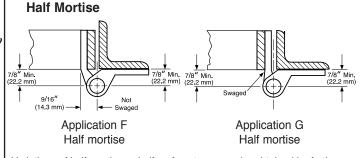

Full Mortise - applications __ 9/16" (14.3 mm) Mir Application D Application C Application E Not swaged Swaged Special swaged

For all full mortise applications the center of barrel should be set 7/8" (22.2 mm) from door and frame so welded joints will clear. Leaves can be swaged apart any distance between 1/16" (1.6 mm) to 9/16" (14.3 mm)

Variations of half mortise or half surface types can be obtained by further bumping or swaging of mortise leaf to accommodate any required construction. Specify hand when ordering
