

DIGISTOR Announces 1TB SSD for 4K RAW Video Recording

High-performance SSD solutions for filmmakers and professional video

Campbell, CA (PRWEB) March 02, 2015

DIGISTOR, a trusted provider of flash and optical data storage solutions, announced today the availability of their 1TB Professional Video Series SSD certified for recording 4K RAW video.

Developed in direct response to the popularity of recording RAW footage, the 1TB Professional Video SSD will delight professional filmmakers looking to streamline their workflow without compromising quality. The DIGISTOR 1TB drive is optimized for use with Blackmagic Design cameras and other professional video cameras and is specifically designed to support high performance uncompressed video capture applications and 4K RAW video.

Unlike many off-the-shelf devices, DIGISTOR's Professional Video Series SSD's are designed for a perfect fit and high performance that will never result in dropped frames. Pre-formatted in exFAT, the 1TB Professional Video SSD can be deployed immediately, while lightning fast speeds allow users to edit content straight from the disk.

All DIGISTOR Professional Video SSDs are approved for use with Blackmagic Design SSD based products, including the Blackmagic Cinema Camera, Production Camera 4K, HyperDeck Studio and HyperDeck Shuttle. DIGISTOR's 240GB and 480GB drives are recommended for 4K and 1080p Apple ProRes (HQ) 422 captures, while the new 1TB drive is recommended for 4K RAW and ProRes captures.

"The new 1TB Professional Video SSD represents a significant increase in storage size and performance over other SSDs on the market, while maintaining the powerful performance and durability our SSDs are known for," says Murray Ellis, Director of Engineering for DIGISTOR. "We are very excited to announce this solution which is ideal for 4K RAW video capture because of the large storage capacity required to film in 4K."

DIGISTOR's new 1TB Professional Video SSDs are shipping now and available at through select dealers, integrators and bundle providers world-wide. MSRP is \$519.00, visit <http://www.digistor.com> for more information.
