## The Difference

- **Internal Compression Height Adjustment Mechanism** – Allows the rim height to raise and lower infinitely from 6' to 10', provides protection from the weather and extends the life of the jack. This mechanism is more efficient and safer than standard tension jacks.
- **Off-Set Steel Pole with Seven-Gauge 3/16" Wall Thickness** – Provides balance and aids in reducing wear and tear on joints of the system, assists in durability.

### OTHER KEY FEATURES:

- 1-1/2" Square Structural Steel Backboard Frame
- Die-Formed Extension Arms
- Ground Anchor Hinge System
- Nylon Bushings – Used on all goal pivot points to prevent steel-on-steel contact, minimizing rusting and hole elongation

### EXTERNAL JACK SYSTEM

All Signature Series Basketball Systems are also available with External Height Adjustment Mechanisms.
