

Rear Bumper Insert Sticker Installation

1. Thoroughly clean the rear bumper surface to avoid imperfections and prevent peeling.
2. Remove 1 letter at a time during installation to avoid mistakes.
3. Fill a spray bottle half full with tap water, and add a few drops of liquid dish soap (DO NOT USE AMMONIA BASED SOAP).
4. Before applying the insert letter, lightly spray down the area on the bumper and the sticky side of the letter insert with the water/soap mixture.
5. Slowly line up the insert letter with the appropriate letter on the bumper. While pressing down lightly, slide the letter insert into position.
6. Working from the center of the letter insert, slowly press out the air & water bubbles to the edge of the insert while still holding the insert in place to avoid movement.
7. Once all of the letter inserts have been applied, allow 1-2 hours to dry.
