

Assembly Guide - BT-350 Cart

 A photograph showing the components for the BT-350 Cart assembly laid out on a green surface. The components include a white wire basket, a grey handle, a white plastic plate with four holes, a white plastic plate with two holes, a silver metal rod, and a silver metal base with a central hole. The wheel set is wrapped in bubble wrap.	<p>1) Prepare as shown in the picture.</p>
 A close-up photograph showing the silver metal rod being inserted into the central hole of the wheel set. The wheel set is wrapped in bubble wrap.	<p>2) Insert the cart rod into the wheel set.</p>
 A close-up photograph showing the grey handle being mounted onto the silver metal rod. Two red circles highlight the mounting points on the handle where screws are used to secure it to the rod.	<p>3) Mount the handle in the marked area using a hex wrench and screw.</p>

4) Install the bracket by fastening two screws on the opposite side of the handle.

5) Remove the bracket mounted on the cart and prepare it with the BT-350 mount bracket.

6) Attach the BT-350 Mount Bracket by tightening the screw and nut on the marked point.

7) Push in the cart slide to attach the bracket. When installing the bracket, release the lock by pulling the back of the button on the marked part.

8) Install BT-350 on the installed cart.
