

PA-04/H Automatic Feeder

Automatic dispensing of small objects directly onto a weighing pan.

PA-04/H

Cylindrical automatic feeder

Ease of assembly and disassembly

Control Panel

Automated statistical control process

Features

Intended Use

The automatic feeder is intended for automatic dispensing of small objects onto the weighing pan of RADWAG-manufactured balance to which it is connected. The device ensures regular feeding of the elements in accordance with determined time intervals.

Mechanical Design

The PA-04/H is based on cylindrical vibrating feeder with conical or stepped storage bin offered in stainless steel version. Surface roughness eliminates grating of the pills and other delicate elements during dispensing. The device is equipped with powder-coated steel housing and stainless steel cover. The storage bin features transparent cover that allows verifying quantity of remaining elements.

Automated Statistical Control Process

Both the feeder and the balance are automated devices. The balance controls PA-04/H operation, dosing start and stop, and adjusts feeding frequency. The feeder features diodes, signalling its operation, and allowing to control the process. Automatic feeder is equipped with function of automatic emptying of the storage bin.

Compatible with

- AS 3Y analytical balance
- XA 4Y analytical balance

- PS 3Y precision balance

Technical Specifications

| | PA-04/H |
|-------------------------|-----------------------|
| Operating temperature | +5 ÷ +40 °C |
| Power supply | 230 V AC 50 Hz |
| Communication interface | RS 232 |
| Protection class | ø 3 ÷ 25 mm |
| Diameter of fed objects | ø 180 mm |
| Feeder diameter | ø 180 mm |
| Throughput | 1 ÷ 15 szt/min |
| Power consumption | 95 W |
| Control | external, via balance |
| Dimensions | 229 x 229 x 303 mm |
| Net/gross weight | 17 / 26 kg |
| Packaging dimensions | 518 x 354 x 304 mm |
