Honeywell

6280W/6280S

RESIDENTIAL COLOR GRAPHIC VOICE TOUCHSCREEN KEYPADS

Honeywell's feature-rich 6280 Color Graphic Voice Touchscreen Keypad family gives you the opportunity to close more sales, increase retention and capture new markets.* They feature a high-resolution 7" widescreen TFT display that doubles as a digital picture frame. There is a choice of silver and white color schemes, three language options and voice annunciation of alarm conditions.

The new intuitive user interface features icons and menus that make system operation easy to navigate. The 6280 uses the same icons as Honeywell Total Connect™ Remote Services, helping to reduce end-user training and costly false alarms.

The digital picture frame and video viewer features let end-users create slideshows and view home movies on the brilliant, high resolution TFT display. Homeowners can customize the slideshow with family photos, vacation pictures and more.

The choice of two color housings and three languages (ideal for homes with multilingual members) opens up new opportunities and markets that previously were untapped. Silver blends perfectly in stainless steel kitchens and garages. White, a popular classic choice, blends seamlessly with lighter décors.

To help you close more sales, Honeywell has created a handheld demo (6280WHD) that includes a sales informercial video that highlights the features and end-user benefits of the 6280. The video can be played by simply pressing a button.

Voice annunciation option in English only.

FEATURES

- High-resolution, 7" widescreen 800 x 480 TFT display
- 16 million colors capability to display vivid images
- Intuitive touchscreen display with icons and menu driven prompts (English only)

FEATURES

Event Log

TouchCenter conveniently displays the most recent actions involving system use. A press on the touchscreen is all it takes to access the event log, letting users easily:

• View when the system was used and who used it
• Track when workers and temporary guests use the system
• Keep tabs on family members (e.g., checking if a child has armed the system upon returning home from school)
• Utilize the TouchCenter as an effective business management tool (e.g., viewing openings and closings)

Keypad

• Emulation of standard 2 x 16 alpha LCD keypad display

• Diagnostics allows testing of:
  – LCD display   – Audio   – LED indicators
