

FIREWORKS SAFETY INSTRUCTIONS

Federal Class F.1 Consumer Fireworks are for sale to persons over 18 years of age
To ensure a fun but safe family fireworks display, it is important that you follow
the safety procedures outlined below:

PEOPLE UNDER 18 YEARS OLD who use fireworks must be supervised by an adult.

NEVER try to light a firework or hold a lit firework in your hand unless the manufacturer's instructions indicate that they are designed to be hand-held.

CHOOSE a wide, clear site away from all obstacles. Refer to the safety instructions on the fireworks label for minimum distances from spectators.

LIGHT CAREFULLY:
Always light the fuse at its tip.

DO NOT FIRE IN WINDY CONDITIONS.

KEEP WATER NEARBY:
Dispose of used fireworks (including debris) in a pail of water.

READ all instructions on the fireworks. PLAN the order of firing before you begin.

WAIT at least 30 minutes before approaching a firework that did not go off. NEVER try to RELIGHT a firework that did not go off. NEVER try to fix a firework that is defective.

USE A GOOD FIRING BASE such as a pail filled with earth or sand.

KEEP fireworks in a cool, dry, ventilated place, out of the reach of children.

Always BURY fireworks that do not have a base HALFWAY in a container of earth or sand (such as a pail, box or wheelbarrow) unless the label on the firework indicates otherwise. Even in the case of Cakes, which do have flat bases, we recommended that you secure these items (either in sand or earth or by using bricks or sandbags around them). Fireworks Cakes may rock or tip when firing unless they are properly stabilized.

IT IS RECOMMENDED that safety glasses be worn.
